

TechBBQ - September 2021

We're selected by Danske Bank to present for you today.

Why?

This is our guess...

We're award-winning software with the best investors and top-tier unit economics disrupting a mass market with an innovative contract automation tool for SMB's.

You're doing it wrong: The PDF is dead, contracts should be stored as metadata.

Digital Contracts Today

Current digital contracting solutions convert contracts into PDFs, where details, audits, and metadata is completely lost

PDFs are almost as useless as paper contracts with no ability to analyze or backwards compatibility. PDF is a dying format!

Digital Contracts of Tomorrow

Contractbook stores contracts as raw JSON with historical metadata, just like any other form of data in today's cloud solutions

This serialized data allows the introduction of AI and comprehensive analysis for organizations with large volumes of contracts.

Allowing AI to Enable Automation Features

Pattern Identification

Analytics

Issue Prevention

Smart Reminders

We're bringing an intelligent and unified experience to contract collaboration, execution and automation for Gen Z and Millennials
