Policy Compliance made easy

JUDICO SECURES SOME MILLIONS IN FUNDING AND IS NOW LOOKING FOR ADDITIONAL PILOT COMPANIES TO TEST THEIR RECENTLY LAUNCHED MVP.

[Judico](#) announces closing their Angel round led by investors [Nordic Fintech Angels](#) and [Accelerace](#).

Judico's "Compliance by Design" solution addresses challenges related to policy compliance & audit preparation and is the first to offer true compliance guidance that proactively helps mitigate any risks of written breaches.

"In this day and age there are so many policies an employee needs to be mindful of, and the majority lack the confidence to know when they inadvertently risk a breach. This can ultimately cost millions from investigations and fines. Judico addresses this by acting as an instant compliance guide, and it helps build a healthy culture of integrity by granting company-wide compliance ownership," says Nichlas Westerby, Co-Founder and CEO.

Following the investment, Judico launched its MVP and is now ready to accept additional innovative companies to pilot the solution.

The funding will ensure further development of customer-critical capabilities ahead of Judico's upcoming Pre-Seed round in the autumn.

With Judico, companies are finally able to front-load policy compliance while making it transparent and intelligent. It connects communication solutions with policies and guidelines and provides a one-stop early warning platform that checks, highlights and guides employees away from policy breaches. For more information, visit www.judico.io, and sign up for a demo.

[Judico](#) is a Danish startup that introduces a new way to mitigate compliance breaches.
